ABSTRACT

Creative activity of talent inseparable part calculated , in this called inspiration psychological situation separately importance profession will reach .

XX century second in the middle appearance was qualification brain microstructure and intuition members with binder hypothesis productive become Brain cells research to grow talented nerve of cells morphological and functional in its properties difference that there is determination possibility hypothesis Qualifications with nerve processes some differential features and supreme nerve of activity types in the middle dependency existence about even if it is true It is close.

KEYWORDS: Heredity, creativity , individual, socio-historical , talent, skill, talent , ability , successful , independent.

INTRODUCTION

Russian psychologist B. M. Teplov and his/her students in their work supreme nerve activity types characteristics impact because of person of abilities in the structure somehow quality features appearance to be to determine have tried . Including , nerve system separately sensitivity known ability badge as to the body arrival possible .

Ability natural condition , qualification nerve system structure and functions characteristics in the composition that about all morphological and functionality adjectives like general genetics to the laws obedience hypothesis justice F. Galton 's heredity laws about idea of ability natural conditioned features description open give can't . Because then to the proof needy very many places exists . Therefore for ability nature biological from heredity not , maybe marriage environment from the lineage to the offspring from the past search to the goal is appropriate , if human development socio-historical laws with management is recognized because of the ability development biological heredity to the laws obedience possible it's not .

Above to the comments based without conclusion to do possible , ability and qualifications natural to the ground related although , but they only of nature gift not , maybe humanity historical development priceless It is suitable . Just like this because of abilities manifestation to be individuals by social needs satisfy during social conditioned knowledge and skills content of delivery obvious to the methods directly It depends . Therefore for abilities development continuous education to the system related that emphasizing transition important importance has .

Talent appearance to be and development of talent socio-historical , natural point of view from the point of view interpretation abilities development high stage because it is evidence Talent Greek precious , rare thing , hereditary natural trait said meaning meaning , specific of activity

successful and creative accordingly execution providing ability and talents from the complex It is an individual characteristic consisting of . Psychological in literature to him/her various definition to be given despite , they have main characters emphasizing he wished , so to the person somehow complicated labor of activity successful , independent and in an original way to perform opportunity giving abilities to the complex talent It is called .

Talent main signs :

- a) success to provide ;
- b) activity independent to do ;
- c) originality element existence ability and talents from the rubble consists of that is;
- d) individual psychological character ;
- e) social marriage modifier creativity opportunity etc.

Psychological information generalized without two kind featured the idea separately emphasizing to go talent structure better understanding opportunity creates .

1) talent is person psychic of the characteristics so is a combination that

a) separate, unique, special ability with ; b) memory high productivity through ; c) even unique quality as a rule measuring It won't be possible .

2) in a person he or she this of ability there is that and enough at the level progressive maturity of talent complicated to the composition incoming other of abilities intense improvement through their instead pressing send (compensation) can do)

Moscow general and pedagogical psychology institute employees by of the students talent , talent concept studied . Determined important abilities assembly mind talent structure to the body Scientific researchers in my opinion , high talent as follows from stages consists of to be possible :

A) such person's first feature intelligence , readiness , seriousness activity to do ready It is a matter of standing .

B) person second feature his/her to work readiness (for work) inclination to work aspiration , labor to need rotation).

C) human third feature then thought features and idea of conduct speed , intelligence order , analysis and generalization high possibilities , intelligence productivity . Data analysis as shown , special talent structure above from adjectives outside clear activity requirements appropriate incoming one row abilities with is filled .

Talent his/ her own general and special adjectives sum with creative achievement of opportunity Talent of skill initial condition although it is considered , but they from each other certain at the level Talent is big . creative and excellent labor is the product of labor . and vital experience of skills necessary complex is the source of creativity . condition and vital experience necessary habit qualifications of the sum is the existence . Creative activity of talent inseparable part calculated , in this called inspiration psychological situation separately importance profession will be . Inspiration and activity productivity to increase aimed at creative from the moment Talent opportunity as a rule psychological event if it is calculated , then skill to the truth turned opportunity is an embodiment . Psychological point of view from the point of view real skill this person of talent in activity manifestation It is to be .

If society development such to people needy if such of people appearance to be opportunity is born . Talent abilities from the collection , their from the set consists of . Separately taken alone abilities although it is progress very high to the level achieved and bright expressed talent

though with equalizing It won't be . About this idea sharp phenomenal to memory has was people about held research evidence gives .
